Super- (sh'pər-, -ər), *prefix*, repr. *L. super* = the adv. and prep. *super* above, on the top (of), beyond, besides, in addition, used in composition with the various meanings detailed below. (Cf. the related *Sk. upari*, Gr. *ὑπερ* *HYPER*, OE. *ofer*, etc. *OVER*.)

A certain number of important Latin compounds, chiefly verbs, belong to the classical period, but the great majority are of later date, and many are recorded first from Christian writers. As a living prefix in English, *super-* first appears about the middle of the 15th c.; it became frequent in Elizabethan times, and in the 17th c. it was very widely used. In more recent times it has been extensively introduced into the nomenclature of chemistry and other sciences as a correlative to *SUB-*. In technical language it sometimes varies with *SUPRA-* (of which the strict correlative is *INFRA-*), e.g. *super-local* and *supra-local*, *superorbital* and *supra-orbital*, *superlapsarian* and *supralapsarian*.

The more important and permanent compounds are entered in this Dictionary as main words; the present article includes such compounds of a general character as have not a permanent status, and scientific terms of which the meaning may (for the most part) be gathered from the meaning of the prefix and that of the radical element.

A considerable number of Latin compounds were adopted in 'learned' form in OF., as *superbender*, *supereminens*, *supererogation*, *superflus*, *superintendence*, *superintention*, *superior*, a few of such compounds became permanently established, as *superfluous*, *superlatif*, *superstition*, but the majority have been superseded by forms with the 'popular' representative of *L. super*, viz. *sur*; e.g. *surabonder*, *suréminent*, *surérogation*, *surintendence*; cf. the parallel forms *superflus*, *surflus* in mod.F.

Pronunciation. The general rule is that the first syllable of the prefix carries the secondary stress of the compound, e.g. *super-add*, *supererogation*, *super-numerary*, *superphosphate*, *supersequialteral*, *super-substantial*. But this syllable carries the main stress where there is a contrast, implicit or explicit, with the radical element as a simple word or with some other compound of it, e.g. *super-class*, *superflux*, *superhive*, *superman*, *super-nature*, *supersall*, *supersolid*, *superstructure*; the

Supra- (sɪˈprə), prefix, repr. L. *suprā* = *suprā* (related to *super* and ultimately to *sub*) *adv.* and *prep.*, above, beyond, in addition (to), before in time, occurring in a few compounds in classical and late Latin; in med. and mod.L. it is mainly restricted to technical terms. Its meanings in English are for the most part parallel to, but in much less vogue than, those of SUPER-; but it is more prevalent than the latter in certain uses, e.g. the scientific uses in 1 and 2 b, in which it is most commonly employed as a living prefix.

The stressing is as in compounds of SUPER-, q.v. p. 166/3.

1. Over, above, higher than; (less commonly) on, upon : in a physical sense.

1. In prepositional relation to the sb. implied in, or constituting, the second element : = SUPER- 1; as in late L. *supræcelestis* SUPRACELESTIAL, mod. L. *supræ-axillaris* (axilla AXIL), *supræfoliaceus* (folium leaf).

SWALLOW sb.²; ulterior relations are undetermined.

As in German and the Scandinavian languages, this verb in English has become weak.

The encroachment of the *o* of the *pa. pple.* and the *a* of the *pa. t.* upon the pres. stem is evidenced from the 12th and 13th centuries respectively; it was perhaps furthered by association with SWALLOW sb.¹
